Ryan Chirnomas focuses his practice on patent prosecution before the U.S. Patent and Trademark Office, specializing in biotechnology, pharmaceutical, chemical, and mechanical engineering inventions. Ryan uses effective communication and problem-solving skills in order to help clients obtain strong patent protection in a cost-efficient manner. He is also experienced at the Patent Trial and Appeal Board, where he has successfully advocated for reversal of rejections in numerous ex parte oral hearings.

Ryan also provides clients with guidance by preparing freedom-to-operate, non-infringement, and validity opinions.
